Company/Individual	Municipality/LLD	Decision Date/ Penalty	Act/ Regulation	Comments / Disposition
Environmental Protection Orders				
Legal Oil & Gas Ltd	Leduc County 31-49-26-W4	07-Jul-04	AEPEA(R) 140	The Company was licenced or otherwise authorized by the Alberta Energy and Utilities Board to operate wells and pipelines. The Alberta Energy and Utilities Board issued Abandonment Orders and Alberta Environment has not issued a reclamation certificate. Alberta Environment is of the opinion that the Company has a duty to reclaim the sites identified in the Abandonment Orders and that as reclamation certificates have not been issued for the sites, that work is necessary in order to conserve and reclaim the sites. The Company shall submit and implement an Investigative Plan for the conservation and reclamation of the sites; submit and implement a Remedial Plan to remediate the sites; submit and implement a Reclamation Plan for the conservation and reclamation of the sites; and apply for a reclamation certificate for each site once it has met the criteria.
Lloydminster Oil Producers Limited	County of Vermilion River NW-11-50-2-W4	18-Aug-04	AEPEA(R) 113	The Company was licenced or otherwise authorized the Alberta Energy and Utilities Board to operate wells. Alberta Environment is of the opinion that a release of one or more substances into the environment may occur, is occurring or has occurred that may cause, is causing or has caused an adverse effect on the environment. The Company shall submit and implement an Investigative Plan and submit and implement a Remedial Plan.
Syncrude Canada Ltd.	MD of Wood Buffalo 93-10-W4	28-Sep-04	AEPEA(R) 113	The Company operates the Mildred Lake Oil Sands processing plant pursuant to an Approval. The Approval provides for the operation of three Carbon Monoxide Boilers which burn the off-gas from the Coker units to generate steam. The off-gas from the Coker units contains amongst other materials, sulphur dioxide, hydrogen sulphide and particulate materials, all of which may result in an adverse effect on the environment. The Approval provides for emissions from the three boiler diverter stacks during periods of operation problems, and one of the boilers experienced tube leaks resulting in a diversion of emissions to the diverter stacks. The boiler tubes have a number of tubes with a thickness in the range of 0.040 inches to 0.050 inches and the calculated tube burst thickness at operating pressure is approximately 0.030 inches. If there is a tube bursting, the boiler must be shut down in an immediate and

Environmental Protection Orders

unplanned fashion for repairs, resulting in a diversion of air emissions to the diverter stacks, and an unplanned shut down may result in the diversion of air emissions into the environment at a time and in conditions when an adverse effect on the environment may occur. Alberta Environment is of the opinion that a release of sulphur dioxide, hydrogen sulphide and particulates may occur, and the release may cause an adverse effect. Therefore, the Company shall submit a Plan and Implementation Schedule; implement the Plan; notify Alberta Environment at least 8 hours before undertaking any remedial work, and submit a final report within 7 days of completion of the remedial action. A final report was received and the conditions of this Order have been achieved. File closed 25 October 2004.
